ANDRI PRAMUJI

SENIOR SOFTWARE ENGINEER | TECHNICAL LEADERSHIP
Bandung, West Java, Indonesia | 0856-1963-999 | thedrongs@gmail.com | linkedin.com/in/andri-pramuji-47aa42220

PROFESSIONAL SUMMARY

Software engineer with **13+** years in technology, specializing in **frontend** and **full-stack development**. Delivered **25** applications across **web**, **mobile**, **desktop**, and **banking payment** platforms. Led teams of up to **12 people** and coordinated delivery across **Frontend**, **Backend**, and **QA**. Combines hands-on engineering, technical leadership, and practical adoption of **agentic AI** development tools to improve **engineering productivity**, **software quality**, and **operational efficiency**.

KEY ACHIEVEMENTS

- At **Nabati**, improved **frontend team efficiency** and **productivity** by **10%** through modernization, build optimization, and stronger engineering practices, as measured in weekly reports.
- At **Arahnet**, refactored **BPD Bali's EDC application**, reducing transaction **packet sizes** by approximately **50%** and cutting response times for complex transactions from **4-5 seconds** to **2 seconds**.
- At **Nelly**, reduced weekly SMS reporting consolidation time by **60%** by building a web-based **SMS gateway** supporting **30 vessels**.

EXPERIENCE

PT. Kaldu Sari Nabati Indonesia (NABATI)

Bandung, Indonesia

Squad Leader | Dec 2025 - Oct 2026

- Led a **9-person** cross-functional squad across **FE**, **BE**, and **QA**, translating business goals into sprint-ready delivery plans.
- Coordinated priorities, workloads, dependencies, risks, documentation, and engineering quality across **Agile** releases.
- Developed and maintained **frontend** applications within **monorepo** and **microfrontend** environments.
- Developed and maintained **backend microservices** across **Sales**, **Inventory**, and **Reporting**.
- Supported and maintained **Logistics, Shipments** and **third-party integrations** through API improvements, and UAT support.
- Improved delivery quality through code reviews, refactoring, automated testing with **Jest** and **Playwright**, and **AI-assisted development** workflows.

Tech Stack: React.js, Next.js, TypeScript, Go, MongoDB, Redis, gRPC, RabbitMQ, cron jobs, REST APIs, Jest, Playwright, Grafana, OpenTelemetry, Elastic APM, Vault, Argo CD.

Technical Lead Frontend | Apr 2024 - Dec 2025

- Led a 12-person frontend team across delivery, legacy support, workforce planning, KPIs, performance review input, hiring and technical decisions.
- Reduced technical debt by **90% (5,000+ to 450)** within **6 months** through **SonarQube** quality gates and refactoring.
- Cut **UI library** build time by **80% (8–10 to 1–2 minutes)** within **3 months** through code cleanup, build & architecture optimization.
- Reduced weekly frontend bug tickets by approximately **70%**, from **20–30** to **5–10,** within **4 months**, through **Jest** testing, **1:1 code reviews, codebase modernization**, and **engineering standardization**.
- Built and maintained internal **full-stack Reporting** tools for senior management using **monolithic** and **layered** architecture.
- Developed and maintained **monorepo**, **microfrontend** web apps and **mobile** apps across **ERP**, **SFA**, **HRIS**, and **field operations**.

Tech Stack: React.js, Next.js, TypeScript, Vite.js, Rollup.js, Ant Design, Tailwind CSS, Zustand, Storybook.js, React Native, Mini Program(Taro.js), Go, Express.js, Node.js, REST APIs, MySQL, Jest, SonarQube, AWS(EC2, S3, RDS).

Senior Frontend Developer | Mar 2023 - Apr 2024

- Developed and delivered **ERP** web modules within a **microfrontend** architecture, alongside **mobile** applications, building reusable frontend workflows and collaborating with backend engineers on API integration, testing, and production releases.

Tech Stack: React.js, Next.js, Ant Design, React Native, REST APIs.

PT. Arah Dinamika Abadi

DKI Jakarta, Indonesia

Frontend Developer – Payment Systems | Dec 2016 - Mar 2023

- Delivered secure **NSICCS**-compliant **ISO8583 EDC**, **POS** and **Terminal Management System** solutions for **7 Indonesian banks**.
- Supported mandatory updates, **pre**- and **post**-**UAT**, issue analysis, regulatory compliance, and legacy system continuity.
- Mentored **3 junior** developers and **interns** from **Feb 2021** to **Dec 2022**.

Tech Stack: C, C++, PHP, Kotlin.

PT. Pelayaran Nelly Dwi Putri Tbk.

DKI Jakarta, Indonesia

IT Staff & Full-stack Developer | Mar 2013 - Nov 2016

- Developed and maintained a full-stack company website using **HTML, CSS, JavaScript, PHP, and MySQL**, enabling regular content updates to support periodic reviews by the **Indonesia Stock Exchange (IDX)**.
- Initiated, built, and maintained a **web-based SMS gateway**, reducing weekly SMS consolidation time by approximately **60%**. Automated company file backups to support operational continuity.
- Provided **infrastructure**, **networking**, **maintenance**, and troubleshooting support for **40+ PCs** across **office** and **operational environments**.

Tech Stack: HTML, CSS, JavaScript, PHP, phpMyAdmin, MySQL.

PROJECTS

Enterprise Web, SaaS & Internal Business Platforms | Mar 2023 - Oct 2026

- Delivered ERP, SFA, HRIS, Salesman Tracker for 8,000+ outlets, Surveyor App, Routing and Tracker System, Logistics Monitoring System, Restaurant Mapping, and a multi-user Meeting App.

NSICCS, EDC & POS Payment Applications | Dec 2016 - Mar 2023

- Delivered **NSICCS-compliant ISO8583 EDC, POS, and TMS solutions** for **7 Indonesian banks: BPD Bali, BPD Jateng, Bank Victoria, BNI, Bank Syariah Mandiri (now BSI), Bank Aceh, and Bank NTT**, supporting certification, **UAT**, issue resolution, mandatory updates, and transaction continuity.
- Provided **legacy payment system support** and **updates for Bank Mandiri.**

SKILLS

Leadership: Engineering Leadership, Technical Leadership, Mentoring, Stakeholder Alignment, Delivery Planning, Risk Management, Performance Review Input, Workforce Planning, Project Management.

Software Design & Architecture: Monolithic, Microfrontend, Microservices, Layered, Event-Driven, Clean, Hexagonal.

Delivery & Engineering Practices: Agile, Scrum, Waterfall, Sprint Planning, Backlog Refinement, Code Review, Trunk-Based Development, Release Planning, Technical Documentation, Engineering Standardization, AI-Assisted Development.

Agentic AI: Codex, Claude Code, Kiro AWS, Antigravity.

Frontend: JavaScript, TypeScript, React.js, Next.js, React Native, Vite.js, Rollup.js, React Query, Zustand, Redux, Axios, Tailwind CSS, Ant Design, Radix UI, Storybook.js, Mini Program (Taro.js).

Backend & Integration: Go, Node.js, Express.js, REST APIs, GraphQL, gRPC, Protocol Buffers, RabbitMQ, Redis, MySQL, MongoDB, PHP, Firebase, cron jobs.

Testing & Quality: Jest, Playwright, SonarQube.

Cloud, DevOps & Observability: AWS(EC2, S3, RDS), Docker, Kubernetes, Argo CD, Vault, OpenTelemetry, Elastic APM, Grafana.

Version Control & CI/CD: Git, GitLab, GitHub Actions.

Management Tools: Jira, ClickUp, YouTrack.

Other Programming Languages: C, C++.

EDUCATION

Bina Nusantara University (BINUS)

Bachelor of Computer Science (S.Kom)

LANGUAGES

Bahasa Indonesia (Native) | English (Business Working Proficiency)
